

Dear Sir/Madam,

My name is Hyder Mohammed and I am a Web Developer with strong educational qualifications in Computer Science with over 3 years of Professional experience in Programming and Development.

I started my career as a Web and Database Developer in India and subsequently relocated to London and worked for a Digital Company as a Junior Developer which helped me improve proficiency in major languages/frameworks/libraries of Web Development.

In my previous role, I was responsible for following tasks on day to day basis:

- Working with the business team and gathering client requirements.
- Participating in the design and analysis sessions with UI/UX teams.
- Overall development of applications and websites for clients from all over Europe using languages like Java, C++, JavaScript and PHP for routine tasks.
- Working with Frameworks and CMS` such as Node.js, Vue.js and WordPress.
- Working with Databases such as PostgreSQL, MySQL, NoSQL / MongoDB.
- Using version control and commits via Git and package installation through NPM.
- Documentation including setup/start-up guides and composing reports with tools like Asana and JIRA.
- Performing Debugging and Testing using Jasmine.
- Integrating Payment gateways into E-commerce platforms.
- Learning new technologies and participating in team building events.

Furthermore, learning new skills and languages on the go, this experience has been invaluable in allowing me to develop my coding dexterity, in conjunction with management skills.

I pride myself on my communication skills and ability to understand client requirements thus building relationships across the business. In addition to my coding competency, I possess excellent adaptive skills in trying to adjust myself with projects on-board.

I believe I can be a great asset by making valuable contributions to your organisation. My CV is attached below and I look forward to being able to discuss a suitable position with you further.

Hyder I Mohammed
